Second Nature: Rethinking the Natural through Politics

Second Nature: Rethinking the Natural through Politics

These essays collected here, by both eminent and emerging scholars, engage interlocutors from Machiavelli to Arendt. Individually, they contribute compelling readings of important political thinkers and add fresh insights to debates in areas such as environmentalism and human rights. Together, the volume issues a call to think anew about nature, not only as a traditional concept that should be deconstructed or affirmed, but also as a site of human political activity and struggle worthy of sustained theoretical attention.
