Exploratory Vision: The Active Eye (Springer Series in Perception Engineering)

Exploratory Vision: The Active Eye (Springer Series in Perception Engineering)

Advances in sensing, signal processing, and computer technology during the past half century have stimulated numerous attempts to design general-purpose machines that see. These attempts have met with at best modest success and more typically outright failure. The difficulties encountered in building working computer vision systems based on state-of-the-art techniques came as a surprise. Perhaps the most frustrating aspect of the problem is that machine vision systems cannot deal with numerous visual tasks that humans perform rapidly and effortlessly. In reaction to this perceived discrepancy in performance, various researchers (notably Marr, 1982) suggested that the design of machine-vision systems should be based on principles drawn from the study of biological systems. This "neuro-morphic" or "anthropomorphic" approach has proven fruitful: the use of pyramid (multiresolution) image representation methods in image compression is one example of a successful application based on principles primarily derived from the study of biological vision systems. It is still the case, however, that the performance of computer vision systems falls far short of that of the natural systems they are intended to mimic, suggesting that it is time to look even more closely at the remaining differences between artificial and biological vision systems.

From reader reviews:

Julie Gailey:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite book and reading a e-book. Beside you can solve your condition; you can add your knowledge by the e-book entitled Exploratory Vision: The Active Eye (Springer Series in Perception Engineering). Try to make the book Exploratory Vision: The Active Eye (Springer Series in Perception Engineering) as your close friend. It means that it can being your friend when you really feel alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know anything by the book. So , we should make new experience and knowledge with this book.

Robert Crawford:

The reserve with title Exploratory Vision: The Active Eye (Springer Series in Perception Engineering) possesses a lot of information that you can learn it. You can get a lot of benefit after read this book. This book exist new information the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to know how the improvement of the world. This particular book will bring you with new era of the internationalization. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Leigh Grayer:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your limited time to read it because this time you only find publication that need more time to be examine. Exploratory Vision: The Active Eye (Springer Series in Perception Engineering) can be your answer given it can be read by you who have those short time problems.

Scott Harrington:

As a college student exactly feel bored to reading. If their teacher expected them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Exploratory Vision: The Active Eye (Springer Series in Perception Engineering) can make you feel more interested to read.
