Incorporates major developments through December of 1997, including the Taxpayer Relief Act of 1997. This book adopts the classic casebook approach to the study of C corporations, S corporations, partnerships, and limited-liability companies, while incorporating an expanded number of problem sets. As revised, the book is intended as a teaching tool adaptable to the newly emerging as well as more traditional law school and business school course offerings in partnership and corporate tax law. There is ample material for a three- or four-credit course on the taxation of C corporations and for a two-credit course focusing on corporate reorganizations.
