Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science)

Sebastian Thrun

Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) Sebastian Thrun

Lifelong learning addresses situations in which a learner faces a series of different learning tasks providing the opportunity for synergy among them. Explanation-based neural network learning (EBNN) is a machine learning algorithm that transfers knowledge across multiple learning tasks. When faced with a new learning task, EBNN exploits domain knowledge accumulated in previous learning tasks to guide generalization in the new one. As a result, EBNN generalizes more accurately from less data than comparable methods.

Explanation-Based Neural Network Learning: A Lifelong Learning Approach describes the basic EBNN paradigm and investigates it in the context of supervised learning, reinforcement learning, robotics, and chess.

'The paradigm of lifelong learning - using earlier learned knowledge to improve subsequent learning - is a promising direction for a new generation of machine learning algorithms. Given the need for more accurate learning methods, it is difficult to imagine a future for machine learning that does not include this paradigm.'
From the Foreword by Tom M. Mitchell.

From reader reviews:

Margaret Wright:

Book is to be different for each and every grade. Book for children right up until adult are different content. We all know that that book is very important for us. The book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) seemed to be making you to know about other know-how and of course you can take more information. It is quite advantages for you. The guide Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) is not only giving you much more new information but also to be your friend when you experience bored. You can spend your current spend time to read your book. Try to make relationship while using book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science). You never feel lose out for everything in case you read some books.

Leigh Grayer:

Here thing why this specific Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) are different and trusted to be yours. First of all reading a book is good but it depends in the content of computer which is the content is as yummy as food or not. Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) giving you information deeper including different ways, you can find any book out there but there is no guide that similar with Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science). It gives you thrill looking at journey, its open up your own eyes about the thing in which happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your method home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) in e-book can be your option.

Dolores Schreiber:

The particular book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) has a lot of information on it. So when you check out this book you can get a lot of help. The book was written by the very famous author. The writer makes some research ahead of write this book. This particular book very easy to read you can find the point easily after perusing this book.

Mamie Crossett:

A lot of people said that they feel fed up when they reading a e-book. They are directly felt that when they

get a half areas of the book. You can choose the book *Explanation-Based Neural Network Learning: A Lifelong Learning Approach* (The Springer International Series in Engineering and Computer Science) to make your own personal reading is interesting. Your skill of reading talent is developing when you such as reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and looking at especially. It is to be initially opinion for you to like to start a book and study it. Beside that the e-book *Explanation-Based Neural Network Learning: A Lifelong Learning Approach* (The Springer International Series in Engineering and Computer Science) can to be your friend when you're truly feel alone and confuse with what must you're doing of these time.
