## **The most complete car encyclopedia- Volume I - Aa to Am - black&white edition: Complete automobile history (Volume 1) Vasilescu Petru Ionut**

This is the first volume from a long series of volumes that will cover all the cars ever build around the world. If you are looking for a traditional story about automobiles, this is not the book you are looking for. If you are looking to read and find out about all the car brands and car models, ever made, since the very first Cugnot automobile, until today, this is exactly the book you need. If this is what you are looking for this is probably the best book out there, the one that you always whisked to be published but no one had the patience and determination to accomplish. The book is based on a database that I personally created, one that now includes more than 20.000 car brands and around 150.000 car models. The work on the database has been completed in 2013 after a continuous daily work that has been started in 1991 and lasted more than 50.000 hour. There is a lot of car passion behind all this work and today it continues with keeping the database up to date a work that still requires few daily hours. The book series will be published in volumes, each one covering a small fraction. Book structure: -all the car brands are sorted in alphabetical order -inside each car brand section, all the models are sorted in 4 different categories: series production, concepts and prototypes, race cars and coach-build models. -inside each category all the models are listed in chronological order -each car model has it's own information text, specifications and photos, covering both the inside and out of the cars and all the different important versions. There may be a few cars, where there is a single or no photo; because there were no photos available or the only photos that do exist could not be published because of possible copyright infringement. There also may be a few models were the information is scarce, because it has been lost in time. This first volume covers all the car brands that have a name starting with numbers or starting with letters between Aa to Am, with a total of 567 car brands and 1915 models.
