# Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis)

## Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis)

This is a methods-oriented book, which contains enormous amounts of information on  $^{31}\text{P}$  NMR, in a concise and well-edited format. It is an invaluable resource for every NMR spectroscopist.

This book consists of 33 chapters, which together 'constitute a compendium that will be of optimal utility to the majority of  $^{31}\text{P}$  NMR spectroscopy users as well as to those perhaps not as familiar with the technique but curious about potential applications in their own research.' (From the editors' preface)

There have been a number of new developments in NMR techniques in the 6 years since Verkade and Quin edited the first, successful book on  $^{31}\text{P}$  NMR. This new book does not supersede the previous book; it offers a wide cross-section of recent research. Compared to the first, basic, grounding volume, this book presents more results (it is more applied); it directly reflects a more mature science.

Arguably, VCH has published the best NMR books in recent years (Neuhaus/Williamson, Croasmun/Carlson, etc.). This new addition to VCH's NMR list ensures the continued visibility and excellence of VCH in this field.

### **From reader reviews:**

#### **Shirley Dildy:**

In this 21st century, people become competitive in most way. By being competitive today, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yes, by reading a publication your ability to survive boost then having chance to stand up than other is high. For yourself who want to start reading the book, we give you that Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis) book as beginning and daily reading e-book. Why, because this book is usually more than just a book.

#### **Deborah Hart:**

The book untitled Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis) contain a lot of information on that. The writer explains the woman idea with easy approach. The language is very easy to understand all the people, so do not really worry, you can easy to read the item. The book was compiled by famous author. The author will take you in the new age of literary works. You can actually read this book because you can continue reading your smart phone, or device, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official web-site in addition to order it. Have a nice examine.

#### **Sarah Creamer:**

Beside this specific Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis) in your phone, it can give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh from oven so don't always be worry if you feel like an older people live in narrow small town. It is good thing to have Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis (Methods in Stereochemical Analysis) because this book offers for your requirements readable information. Do you at times have book but you do not get what it's exactly about. Oh come on, that will not happen if you have this within your hand. The Enjoyable option here cannot be questionable, including treasuring beautiful island. Use you still want to miss the item? Find this book as well as read it from at this point!

#### **Vickie Kay:**

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is published or printed or created from each source this filled update of news. On this modern era like today, many ways to get information are available for anyone. From media social just like newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Phosphorus-31 NMR Spectral Properties in Compound Characterization and Structural Analysis

(Methods in Stereochemical Analysis) when you essential it?
