Atomic Genetics and Color of the Objects: Science without Religion is Blind and Religion without Science is Lamé - Einstein (Part -10) Dr Vijay Mohan Das

Why our universe is so colorful ?

Color perception, like sound perception, is a complex subject involving the disciplines of psychology, physiology, biology, chemistry and physics. When you look at an object and perceive a distinct color, you are not necessarily seeing a single frequency of light. Consider for instance that you are looking at a shirt and it appears purple to your eye. In such an instance, there may be several frequencies of light striking your eye with varying degrees of intensity. Yet your eye-brain system interprets the frequencies that strike your eye and the shirt is decoded by your brain as being purple. [20]

Modern physicists believe that the color of the VIBGYOR is due to different frequencies of energy quanta ($h\nu$) or monochromatic photon . Participatory science has proved that energy particles is the carrier of activated mind ness of different colors and they are divine units and this divinity is due to presence of atomic genes on basic building blocks (B.B.Bs.) , the fundamental particles and divine activity or fundamental activity of the nature is atomic transcription or thought expressions. To answer how laws of color formation are made is now easy due to the research of fundamental particles i.e. B.B.Bs and Atomic Genetics. Mathematics alone is unable to explore the reality behind any color phenomena. Participatory science is ultimate science to know about any color phenomenon of the universe. Without this science, transparency in explaining color phenomenon is absent.

From reader reviews:

Deborah Mele:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your moment to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you have problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find book that need more time to be learn. Atomic Genetics and Color of the Objects: Science without Religion is Blind and Religion without Science is Lame - Einstein (Part -10) can be your answer because it can be read by an individual who have those short spare time problems.

Travis Smith:

In this period globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The book that recommended for your requirements is Atomic Genetics and Color of the Objects: Science without Religion is Blind and Religion without Science is Lame - Einstein (Part -10) this guide consist a lot of the information of the condition of this world now. This book was represented how do the world has grown up. The words styles that writer require to explain it is easy to understand. The actual writer made some research when he makes this book. Here is why this book suited all of you.

Nathaniel Mitchell:

On this era which is the greater person or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple solution to have that. What you have to do is just spending your time very little but quite enough to have a look at some books. One of several books in the top record in your reading list will be Atomic Genetics and Color of the Objects: Science without Religion is Blind and Religion without Science is Lame - Einstein (Part -10). This book which is qualified as The Hungry Hills can get you closer in growing to be precious person. By looking right up and review this guide you can get many advantages.

Donald Burgess:

What is your hobby? Have you heard that question when you got students? We believe that that concern was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you also know that little person such as reading or as studying become their hobby. You need to know that reading is very important and also book as to be the issue. Book is important thing to include you knowledge, except your teacher or lecturer. You discover good news or update in relation to something by book. Different categories of books that can you choose to adopt be your object. One of them is Atomic Genetics and Color of the Objects: Science without Religion is Blind and Religion without Science is Lame - Einstein (Part -10).
