Foundational Issues in Human Brain Mapping (MIT Press)

Foundational Issues in Human Brain Mapping (MIT Press)

The field of neuroimaging has reached a watershed. Brain imaging research has been the source of many advances in cognitive neuroscience and cognitive science over the last decade, but recent critiques and emerging trends are raising foundational issues of methodology, measurement, and theory. Indeed, concerns over interpretation of brain maps have created serious controversies in social neuroscience, and, more important, point to a larger set of issues that lie at the heart of the entire brain mapping enterprise. In this volume, leading scholars -- neuroimagers and philosophers of mind -- reexamine these central issues and explore current controversies that have arisen in cognitive science, cognitive neuroscience, computer science, and signal processing. The contributors address both statistical and dynamical analysis and modeling of neuroimaging data and interpretation, discussing localization, modularity, and neuroimagers' tacit assumptions about how these two phenomena are related; controversies over correlation of fMRI data and social attributions (recently characterized for good or ill as "voodoo correlations"); and the standard inferential design approach in neuroimaging. Finally, the contributors take a more philosophical perspective, considering the nature of measurement in brain imaging, and offer a framework for novel neuroimaging data structures (effective and functional connectivity -- "graphs").

Contributors: William Bechtel, Bharat Biswal, Matthew Brett, Martin Bunzl, Max Coltheart, Karl J. Friston, Joy J. Geng, Clark Glymour, Kalanit Grill-Spector, Stephen José Hanson, Trevor Harley, Gilbert Harman, James V. Haxby, Rik N. Henson, Nancy Kanwisher, Colin Klein, Richard Loosemore, Sébastien Meriaux, Chris Mole, Jeanette A. Mumford, Russell A. Poldrack, Jean-Baptiste Poline, Richard C. Richardson, Alexis Roche, Adina L. Roskies, Pia Rotshtein, Rebecca Saxe, Philipp Sterzer, Bertrand Thirion, Edward Vul

From reader reviews:

Angel Echols:

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to understand everything in the world. Each reserve has different aim or perhaps goal; it means that reserve has different type. Some people feel enjoy to spend their the perfect time to read a book. They are really reading whatever they have because their hobby is reading a book. How about the person who don't like looking at a book? Sometime, individual feel need book after they found difficult problem or maybe exercise. Well, probably you will require this Foundational Issues in Human Brain Mapping (MIT Press).

Maria Hernandez:

You can find this Foundational Issues in Human Brain Mapping (MIT Press) by go to the bookstore or Mall. Merely viewing or reviewing it may to be your solve issue if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by means of written or printed but also can you enjoy this book simply by e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose appropriate ways for you.

Fanny Rutledge:

Do you like reading a book? Confuse to looking for your best book? Or your book ended up being rare? Why so many query for the book? But just about any people feel that they enjoy to get reading. Some people likes examining, not only science book but novel and Foundational Issues in Human Brain Mapping (MIT Press) as well as others sources were given know-how for you. After you know how the great a book, you feel wish to read more and more. Science publication was created for teacher or perhaps students especially. Those textbooks are helping them to add their knowledge. In various other case, beside science publication, any other book likes Foundational Issues in Human Brain Mapping (MIT Press) to make your spare time a lot more colorful. Many types of book like this.

Scott Settle:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And also you know that little person including reading or as examining become their hobby. You need to know that reading is very important in addition to book as to be the matter. Book is important thing to add you knowledge, except your personal teacher or lecturer. You will find good news or update with regards to something by book. Numerous books that can you go onto be your object. One of them is niagra Foundational Issues in Human Brain Mapping (MIT Press).
