Java Web Services Unleashed Robert J. Brunner, Frank Cohen, Francisco Curbera, Darren Govoni, Steven Haines, Matthias Kloppmann, Benoit Marchal, K. Scott Morrison, Arthur Ryman, Joseph Weber, Mark Wutka

"Java Web Services Unleashed" explores everything Java developers need for Web service development. Starting with the business considerations and roles of service-related technologies within the Java architecture, the authors then demonstrate applications using the "pillars" of Web service creation: SOAP, UDDI, and WSDL. Next, the book introduces the JAX* pack - a set of Java APIs for XML programming that ease and enhance service development - using real-world examples explaining the importance of each JAX* API. Later chapters include a series of larger case studies of service development using many Java technologies including JSP and EJB.
