Performance Analysis of Complex Networks and Systems

Piet Van Mieghem

Performance Analysis of Complex Networks and Systems Piet Van Mieghem

This rigorous, self-contained book describes mathematical and, in particular, stochastic and graph theoretic methods to assess the performance of complex networks and systems. It comprises three parts: the first is a review of probability theory; Part II covers the classical theory of stochastic processes (Poisson, Markov and queueing theory), which are considered to be the basic building blocks for performance evaluation studies; Part III focuses on the rapidly expanding new field of network science. This part deals with the recently obtained insight that many very different large complex networks - such as the Internet, World Wide Web, metabolic and human brain networks, utility infrastructures, social networks - evolve and behave according to general common scaling laws. This understanding is useful when assessing the end-to-end quality of Internet services and when designing robust and secure networks. Containing problems and solved solutions, the book is ideal for graduate students taking courses in performance analysis.

From reader reviews:

Michael Coffman:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to decide on book like comic, small story and the biggest one is novel. Now, why not striving Performance Analysis of Complex Networks and Systems that give your pleasure preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the means for people to know world considerably better than how they react in the direction of the world. It can't be stated constantly that reading behavior only for the geeky man but for all of you who wants to possibly be success person. So , for all of you who want to start examining as your good habit, you are able to pick Performance Analysis of Complex Networks and Systems become your personal starter.

Michelle Saunders:

With this era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become certainly one of it? It is just simple solution to have that. What you are related is just spending your time almost no but quite enough to get a look at some books. On the list of books in the top checklist in your reading list is Performance Analysis of Complex Networks and Systems. This book which is qualified as The Hungry Hillside can get you closer in becoming precious person. By looking way up and review this reserve you can get many advantages.

Paul Delatorre:

As a pupil exactly feel bored in order to reading. If their teacher expected them to go to the library as well as to make summary for some guide, they are complained. Just small students that has reading's internal or real their pastime. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Performance Analysis of Complex Networks and Systems can make you experience more interested to read.

Gary Ritchie:

Some individuals said that they feel bored stiff when they reading a e-book. They are directly felt the item when they get a half regions of the book. You can choose the book Performance Analysis of Complex Networks and Systems to make your own personal reading is interesting. Your own personal skill of reading skill is developing when you including reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be 1st opinion for you to like to open a book and examine it. Beside that the reserve Performance Analysis of Complex Networks and Systems can to be your brand-new friend when you're really feel alone and confuse using what must you're doing of the

time.
